## For **MICRO** Flows

Create Dynamic GAS Mixtures

## HIGH FLEXIBILITY - From static to dynamic GAS Mixtures

Pre-mixed Gas Cylinders are notoriously expensive and limiting. By using the MCQ Gas Mixers it is possible to create dynamic gas mixtures at any time, letting you free to set your flow rates, concentrations and blending on-demand from different sources of Gas.

GB100 Plus provides a level of flexibility that gas cylinders simply cannot.

# The Ultimate Gas Mixers.

MCQ Instruments offers the best, cheapest and fastest solutions to manage, control, measure and create Gas Mixtures or Dilutions.

We produce advanced, certified, interconnected, and trusted technologies that can help you to achieve your goals without any efforts. From laboratories to industrial needs, we have the right product that will manage your gas processes with automation and an incomparable precision.

## Gases:

N2,  
O2,  
CO2,  
CH4, Air,  
He, H2

(additional gases  
supported on request)

## Touch Display.

The Gas Blender 100 Plus is a stand - alone device, and it allows you to control all the parameters and access all the main features by the Touch Display. The user interface already contains several of the most important actions such as: Play and Stop the gas mixing, regulation of the gas ratio for each channel, native gases setting and much more.

## Easy to Integrate.

Gas Blender 100 Plus is not only USB connected.

Its integrability with Profibus, Modbus & Simulink gives the possibility of an extremely easy integration into other systems. Moreover, we supply a Python Library to control the instrument via RS485.

# Intuitive Software.

## AUTOMATION AND FLEXIBILITY

For Advanced functionality or to control the instrument via PC, we also provide MCQ Mixture Creator. A complete gas mixing software, that allows direct access and control to all the parameters of our products. Thanks to a user-friendly interface, you can manage the gas mixing process to modify and control both the final blending and your dynamic dilution.
